TECHNICAL EXPERTISE

Product: product management for 0 to 1 technical products (conception to launch), quality evaluation, quality standards, product roadmap metrics, cross-functional delivery with engineering and operations

Data: Python, geospatial datasets, driving telemetry, GPX, Excel, self-directed data analysis

Domain: ADAS, road network validation, vehicle sensor data, auto OEM, consumer navigation, EV wire-harness integration

Design & CAD: Siemens NX (UG-NX), CATIA V5, SolidWorks, GD&T, DFMEA, ECR/CN, PPAP/FAI

PROFESSIONAL EXPERIENCE

Porsche Engineering Services North America - Engineering Intern Jun 2025 - May 2026
ADAS Validation Platform, Data & Vehicle Integration Carson, CA

- When ADAS validation was a 4-hour manual cycle, I built a geospatial vehicle-data platform in Python, cut the core cycle to 25 minutes, and used the output with engineering and operations so fleet telemetry and route tracking could be trusted.
- The program was a 10-vehicle pilot, so I defined routing and test-execution, scaled data capture to a 50-vehicle fleet, and held quality against a 98% CARIAD target.

Mercedes-Benz R&D India - Product Design Engineer Sep 2022 - Jul 2024
EV Wire-Harness & Electromechanical Integration Pune, India

- CLA rear-end harness integration was blocking production release, so I owned Siemens NX routing, packaging, and GD&T drawings, ran DFMEA and ECR/CN updates, and cleared PPAP/FAI with Kroschu in Germany.

Cummins - Design Intern, Engine Test & Validation Jun 2021 - Sep 2021
Durability & Validation Support Pune, India

PROJECTS & LEADERSHIP

Audio PCBA Enclosure - Electronics Packaging (SolidWorks)

- Reverse-engineered a connector-dense audio PCBA with calipers and designed an injection-moldable enclosure with board-retention bosses, connector clearances, and port cutouts.

Formula Student, Veloce Racing - Chassis & Braking Lead

- Performed structural FEA on chassis components under dynamic load cases, evaluated forged-material selection for fatigue life, and validated tolerance stack-ups during system integration.

EDUCATION

University of Southern California - M.S, Engineering Management | GPA: 3.85/4.0 May 2026
Vishwakarma Institute of Technology - B.Tech, Mechanical Engineering May 2022
